

Sales Specification

Amyl Acid Phosphate

Amyl Acid Phosphate contains an approximate equimolar quantity of monoamyl acid phosphate and di-amyl acid phosphate.

Test	Specifications
Acid Number, mg KOH/g	360 Min.
Color, APHA	100 Max.
Specific Gravity @ 25°C/4°C	1.07 - 1.085

Physical Properties

Appearance	Clear Liquid
Density @ 25°C	9.0 lbs/gal
Flash Point, Cleveland Open Cup	>200°F

Uses

Amyl Acid Phosphate has a variety of industrial uses including esterification catalyst and polymerizing agent, curing catalyst and accelerator in resins and coatings, surfactant and stabilizer.

Amyl-01 10/11
